EDUCATION

Redeemer's University, Ede

B.Sc. Computer Science (Expected Oct 2027)

Oct 2023 – Oct 2027

Programming Coursework: Data Structures and Algorithms, Artificial Intelligence, Operating System, Problem Solving, Software Development.

EXPERIENCE

HNG | Intern - Frontend Developer

Feb 2024-March 2024

- Developed responsive and interactive web applications using React.js, JavaScript, and Tailwind CSS.
- Implemented an AI-powered text processing tool utilizing Chrome's AI APIs for translation, summarization, and language detection.
- Collaborated with a team in a fast-paced, agile environment, ensuring clean UI/UX, accessibility, and performance optimization.

JETA Comms | Intern – Full Stack Developer

Oct 2022 - August 2023

- Learned foundational web development skills including HTML, CSS, JavaScript, Python, and Django.
 - Built and designed multiple projects such as a movie website and various landing pages.
 - Collaborated with a team to develop a dictionary application and a CBT application.
-

PROJECTS

Personal Website: www.devayomide.com

Recipe Recommender | Recipe Recommender

- Developed a responsive and interactive UI using React.js & Tailwind CSS, ensuring seamless user experience during the Stackup Hackathon.
- Implemented a search system and a chatbot feature that allows users to input available ingredients and dietary preferences, dynamically fetching AI-powered recipe recommendations.
- Ensured smooth API integration with the backend handled by my teammate, efficiently fetching and displaying recipe details.

Chart Capstone Limited Website | Chart & Capstone

- Designed and developed a corporate website for Chart Capstone Limited, a company specializing in Oil & Gas, Agriculture, Solid Minerals.
- Created a modern, responsive, and visually appealing UI using React.js and Tailwind CSS.

Event Ticketing Generator | Conference-ticket-generator

- Built a Conference Ticket Generator using React.js, allowing users to fill out a form and generate a personalized ticket.
 - Implemented form validation ensuring valid input for name, email, and avatar URL.
 - Integrated Cloudinary for avatar uploads, allowing users to store and display profile pictures.
-
