SUMMARY

Software Engineer and Computer Science undergraduate (**First Class, 4.92/5.0 CGPA**) with **5+ hackathon wins** across blockchain, AI, and fintech. Specializes in building scalable, real-world products for African and emerging markets using Next.js, TypeScript, Supabase, and Python. Proven track record shipping AI-powered tools, fintech platforms, and developer libraries with measurable impact.

EDUCATION

Redeemer's University, Ede, Osun State, Nigeria

B.Sc. Computer Science (Expected **2027**)

- **CGPA: 4.92 / 5.00 – First Class Honors**
- **2x Dean's List, Gold Scholar (2023/24), Bronze Scholar (2024/25)**
- Relevant Coursework: Data Structures & Algorithms, AI, Database Systems, Software Engineering.

EXPERIENCE

Platnova (via Engineer Contractor) – (Aug 2025 – Mar 2026, Part-time / Remote)

- Optimized data retrieval efficiency by architecting a persistent filter management system using Redux Toolkit, reducing search latency for high-volume transaction tables.
- Implemented financial operations features including OTC payout management, transaction fee structures, and live exchange rate configuration for the admin dashboard.

HNG Internship – Frontend Developer Intern (Feb 2025 – Apr 2025)

- Built responsive web applications using **React.js, Tailwind CSS**, improving user engagement by **20%**.
- Built an AI-powered text processing tool with Chrome AI APIs, enabling translation and summarization for **1,000+** text inputs with **95%** accuracy.

JETA Comms Bootcamp – Web Developer Trainee (Oct 2022 – Aug 2023)

- Built a computer-based testing (CBT) platform streamlining assessments.
- Developed a dictionary app, enhancing user access to **10,000+** word definitions.

PROJECTS

Arbitrum Token App (Blockchain Fintech Platform)

- **Winner – Arbitrum Builders Bounty Challenge (StackUp, 2025)**
- Developed a **decentralized token management platform** on Arbitrum using React, Solidity, and Ethers.js, enabling secure token minting and transfers.

Top 10 Winner — Canton Construct Ideathon 2025

Project: AyPrivy (PrivyLend)

- Architected and deployed a fintech lending prototype using React and Node.js within 4 days, securing a Top 10 finish among 50+ teams.

SeeForMe - 2nd Place, AI in Medicine Competition (DATICAN, 2025).

- Led frontend development, integrating image processing APIs for **90%** accurate obstacle detection.

WhatsNaija AI

- Designed and shipped an agentic WhatsApp automation platform for Nigerian SMBs, enabling business owners to manage customer interactions and orders directly via WhatsApp using **Node.js and WhatsApp Business API**.

CareLoop (AI HealthTech Solution) - Top 10 in Meta x Nithub Hackathon (2025)

- Built AI-powered patient follow-up system using **React, Node.js, and Twilio APIs**, automating communication for **100+** simulated patients.

LEADERSHIP & VOLUNTEERING

Cowrywise Ambassador & Student Tutor – Redeemer's University (Oct 2024 – Present)

- Promoted financial literacy to students.
- Mentored **50+** students in Mathematics and Physics, improving pass rates by **10%**

Media Team Member – RCCG Christway Chapel (Jan 2023 – Present)

- Managed livestream tech operations, ensuring **100%** uptime for events with **200+** viewers

SKILLS

- **Languages & Frameworks:** React.js, Next.js, JavaScript (ES6+), Tailwind CSS, TypeScript, Python, API Integration.
- **AI & APIs:** OpenAI API, Groq, Chrome AI APIs, Paystack, Twilio, WhatsApp Business API
