Ayomide Taiwo

Computer Science Student | Payments & Enterprise Systems

+2349168897258 | ayomidepaul784@gmail.com | linkedin.com/in/taiwoayomide | github.com/dev-ayomide | devayomide.vercel.app

Education

Redeemer's University **Ede, Osun State, Nigeria**

*B.Sc. Computer Science | CGPA: **4.89 / 5.00**, First Class Honours (UK 1st equivalent)* *Expected July 2027*

- **2× Dean's List** · Gold Scholar (2023/24) · Bronze Scholar (2024/25)
- Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence, Database Systems, Operating Systems, Software Engineering

Experience

Heirs Technologies **Jul 2026 – Sep 2026**

Artificial Intelligence Intern, Software Engineering Team *Victoria Island, Lagos*

- Shipped **AI knowledge retrieval** into the group's production **ITIL 4 IT service management platform**, serving **15 tenant organisations** across banking, insurance and energy (NestJS, PostgreSQL + pgvector, Prisma, Redis/BullMQ).
- Built the retrieval pipeline over **2,400+ historical tickets**, embedding **1,318 deduplicated resolutions** and tuning **tiered confidence thresholds** governing auto-response, private analyst note, or escalation to a human resolver.
- Backed the release with **231 new automated tests** and shipped it behind environment flags on a **four-phase staged rollout** approved by the CEO and line manager.
- Designed **department-scoped, read-only, fail-closed** data access for the AI assistant on the internal **risk, compliance and audit** platform, so no user can retrieve another department's data through chat.

Platnova **Aug 2025 – Mar 2026**

Contract Software Engineer | Fintech Payments & Admin Platform *Remote*

- Built and iterated on the **customer-facing payments app**: deposit flows, virtual card issuance forms, and transfer-method performance optimisations (React, Vite).
- Delivered **admin platform** features spanning **KYB compliance reviews**, merchant wallet management, **settlement workflows** and audit trails, working with product, design and engineering.

Campor **Oct 2025 – Present**

Co-Founder & Frontend Engineer *Redeemer's University*

- Co-founded a live campus marketplace for students at Redeemer's University; leading frontend development, product decisions, and user onboarding from idea to launch.

Projects

NairaLedger | *FastAPI, PostgreSQL, Redis, ARQ, LangGraph, Pydantic v2, Pytest* | GitHub **2026**

- Built a **production-grade payments and ledger API** handling accounts, deposits and transfers under strict financial correctness: **minor-unit storage** for ledger integrity, **idempotent request handling**, and **row-level locking** for concurrency control on simultaneous transactions.
- Designed an **asynchronous job queue** (Redis + ARQ) for transfer settlement with **webhook delivery**, exponential backoff retries and a **dead-letter queue**, so no transaction is silently lost and every state change is auditable.
- Layered a **natural language query agent** (LangGraph) on top, letting users interrogate balances and transaction history in plain English with persistent session memory.

Fusion | *React, Remotion, Node.js* | **2nd Place, Interswitch × Enyata Buildathon** | GitHub **2026**

- Turns a natural-language prompt into fully editable React/Remotion scene components with a **multi-track timeline editor** and brand asset extraction from a URL; **built in 4 days** and demoed live at **Interswitch HQ**, placing **2nd out of 500+ teams**.

Technical Skills

Languages: Python, TypeScript, JavaScript (ES6+), SQL
Backend & Data: FastAPI, NestJS, PostgreSQL (pgvector), Redis, SQLAlchemy async, Prisma, REST APIs, Webhook architecture, Pytest
Frontend: React.js, Next.js, Tailwind CSS
Tools & AI: Git, Docker, Linux, LangGraph, Claude/Gemini/OpenAI APIs

Hackathons & Awards

2nd Interswitch × Enyata Buildathon (500+ teams) · **1st** RUNACOSS Web Design Contest · **2nd** DATICAN AI in Medicine · **Winner** ALATPay Buildathon · **Top 10** Canton Construct Ideathon (938 participants) · **10th** StackUp September Coding Challenge
Bounty Winner: Hedera Origin Bounty (DoraHacks), Arbitrum Builders Bounty

Leadership & Community

RUNTECHSPACE, Redeemer's University **Aug 2025 – Present**

Technical Director (previously Frontend Stack Lead)

- Set technical direction for the campus tech community; mentor junior developers on React, Next.js and modern engineering practice.

Millennium Fellowship (Class of 2026), UN Academic Impact & MCN **2026 – Present**

Millennium Fellow | Founder, StreetGuard

- Leading **StreetGuard**, a mobile street-safety application for Lagos, submitted under **SDG 11**.

Cowrywise Financial Literacy Ambassador & Student Tutor **Oct 2024 – Present**

Redeemer's University

- Ran campus financial literacy initiatives while tutoring **50+** students in Mathematics and Physics.
